

# The Digital Odyssey: A Cyber-Safety Adventure!

A magical guide  
for Little Sailors  
and their Captains.

Meet Little Odysseus!  
He loves sailing his little boat  
across the huge Digital Sea—a  
magical place we call the  
Internet.

There are so many  
fun islands to explore!  
But the sea has some  
tricky monsters, too...

# The Golden Rule of the Sea!

I am always here to help you steer!

Before we set sail, Little Odysseus knows the most important rule: Never sail without the Captain! The Captain is your parent, teacher, or guardian.

# Threat 1: The Nosy Cyclops

Suddenly, a giant Cyclops blocks the path! He doesn't want to hurt the boat, but he asks way too many questions.

Hello little boat!  
What is your real name?  
Where do you live?  
What school do  
you go to?

# Defense: The 'Nobody' Shield

My name is Nobody!  
And my secrets stay  
safe in my boat!

Odysseus uses his magic shield!  
He knows we never give our real  
name, address, or photos to  
strangers on the Digital Sea.

# Threat 2: The Sweet Lotus Candies

Look! Free games and shiny apps floating in the water! They look like delicious Lotus Candies. But 10 of these candies!

Free!

Download Now!

Play Me!

But some of these candies will make your tablet sick or make you forget to do your homework!

# Defense: The Captain's Compass

Before grabbing a digital candy, Odysseus checks his magic compass. It reminds him to always ask the Captain for permission before clicking 'Download'.

If the Captain says it's safe, then we can play!

# Threat 3: The Singing Sirens

♪ You won a prize! ♪

♪ Click here for  
free Robux! ♪

The Sirens sing beautiful songs about winning a million free toys! They want you to click their shiny links and steer your boat into the rocks.

# Defense: The Double-Magic Lock

1

1. The Golden Key  
(Your secret password).

To ignore the Sirens' tricks, we use  
a Double-Magic Lock!  
One lock isn't strong enough anymore.

2. The Captain's Seal  
(A magic code sent to the  
Captain's phone).

## Threat 4: The Sneaky Wooden Horse

A giant, free toy horse! But wait... hackers love to hide nasty digital bugs inside things that look like fun games. This is a Sneaky Trojan Horse.

# Defense: The X-Ray Spyglass

Odysseus uses his X-Ray Spyglass! It scans the file to make sure no sick bugs are hiding inside. Always let your Captain scan new files before you open them!

## The Hero's Secret Weapon: The Magic Bow

Your password is like  
Odysseus's Magic Bow.  
It only works for YOU!  
If you give it to a  
stranger, or even your  
best friend, it loses its  
magic.

My passwords  
are just for me!

# Penelope's Trick: The 'Off' Spell

**See something  
weird or scary?**

**Unravel the Web!**  
(Close the screen or  
push the OFF button).

**Yell for the Captain!**  
(Tell an adult right away).
